

Neighborhood notice 13.03.2026

Greetings from the Koskela depot construction site

Work at the construction site is progressing rapidly, and elements of the future depot have already been erected on the site.

We are ahead of schedule and are now six months ahead of the original plan. Read more about the schedule here: <https://kaupunkiliikenne.fi/varikot/koskelan-varikko-rakentuu-hankkeesa-on-kiritty-aikataulussa/> (Only in Finnish)

We completed the piling work at the end of February. Some additional piling will be done during the spring. Noisy sounds will be heard from the construction site throughout the spring as the final geothermal wells are drilled. Pile cap and structural frame work is progressing as planned on the site and will not cause significant noise disturbance to the neighborhood. Noisy work will only be carried out on weekdays between 7 a.m. and 6 p.m.

Best regards,
The Koskela Depot project team
