

Neighborhood notice 20.05.2026

Greetings from the Koskela depot construction site

Work at the construction site is progressing rapidly. The pile slab work was completed at the end of April, and the drilling of geothermal wells is expected to be finished by the end of May.

Piling work will be carried out on the Kustaa Vaasan tie side of the site in early June. Work will begin in week 23 and end in week 25. In addition to the piling, the drilling of geothermal wells will cause occasional noise. Both of these are work phases subject to a noise permit and will be carried out only on weekdays between 7 a.m. and 6 p.m.

Other work currently underway at the site includes the installation of structural elements, roofing work, interior backfilling and floor finishing, and the installation of tracks. Outside the structural elements, earthwork and foundation preparation are being carried out.

Best regards,
The Koskela Depot project team

Overview of the Koskela depot construction site

The project is being carried out by Akseli Alliance, which includes the client Metropolitan Area Transport, main contractor Skanska, and planning partners Sweco, Rejlers, and Arkkitehtityöhuone APRT.
