

Neighborhood notice 29.06.2026

Summer Greetings from the Koskeladepot

At the Koskela depot construction site, the depot is taking shape at a rapid pace, and work will continue throughout the summer. The noisiest tasks, such as drilling for geothermal wells, were completed during the spring. More and more components of the future depot are being installed all the time, and the structure is starting to look more and more like a building with each passing day. The construction site ensures that the site roads are regularly watered to prevent sand dust from spreading to the surrounding area.

In addition to the construction of the Koskela depot itself at the construction site, birdhouses and insect hotels have been built in the depot area and on the Annala field. You can read more about these nature projects on the Koskela depot project website: <https://kaupunkiliikenne.fi/uutisartikkelit/koskelan-varikkotyomaan-ymparisto-elavoityy-koululaisten-ja-talkoolaisten-voimin/> and in the Helsingin Uutiset website: <https://www.helsinginuutiset.fi/paikalliset/9539507>.

The depot is being built for its future users, and on the depot project's website, you can also read about how the future users have been involved in the design of the future garage: <https://kaupunkiliikenne.fi/koskelan-varikko/koskelan-varikko-rakennetaan-yhdessa-kayttajien-kanssa/>

Current work phases at the construction site include prefabricated element installation, as well as roofing work, foundation work, and track work, among other things. Upcoming work phases this summer include building services work and rail installation on the test track in the outdoor area.

Best regards,
The Koskela Depot project team

Overview of the Koskela depot construction site

The project is being carried out by Akseli Alliance, which includes the client Metropolitan Area Transport, main contractor Skanska, and planning partners Sweco, Rejlers, and Arkkitehtiyöhuone APRT.

For more information in English, visit the project website at kaupunkiliikenne.fi/koskelanvarikko. For feedback or questions, send us a message at koskelanvarikko@skanska.fi.
