

Neighborhood notice 03.09.2026

Greetings from the Koskeladepot

Work is currently in full swing at the Koskela depot. Nearly 150 people are working on site every day. Earthworks are underway outside, and asphalt has already been laid in the test track area.

The depot's structural framework is progressing well: about 90 % of the structural elements are already in place, and the framework is due to be completed during October. Bricklaying and glazing work is currently underway on the façade, and the roofing is also progressing as planned.

Inside the depot, track work is underway. In addition, bricklaying, painting, floor screeding and the installation of building services are taking place indoors.

Switches manufactured at City Transport's own workshop have been installed at the depot. You can read more about this work on the project's website:

<https://kaupunkiliikenne.fi/koskelan-varikko/kevyempi-rakenne-ja-esivalmistus-sujuvoittavat-vaihteiden-asennusta-koskelan-varikolla/>

In addition to the work at the depot, the project has leased a park area on Valtimontie from the city. The area will serve as a fenced-off and closed car park for the construction site until approximately the end of 2027.

Preparatory work on the car park will begin this week, and the construction work is expected to take around four weeks. Once work begins, traffic to the new car park will naturally increase, and we will be paying particular attention to pedestrian traffic crossing the site. Temporary traffic arrangements on Valtimontie may be necessary.

We apologise for any inconvenience caused to the neighbourhood.

Best regards,
The Koskela Depot project team
