Neighborhood notice 26.10.2026

## Latest updates from the Koskela Depot construction site

Construction work at the site is progressing according to plan. The building's structural frame has been completed, and various installation works are currently underway both inside and outside the facility.

Inside the depot building, walls, floors, and ceilings are being built and finished. At the same time, technical building systems are being installed, including plumbing, ventilation, electrical systems, and fire safety equipment. Work related to the rails and floors in the depot halls is also continuing.

Outside the building, facade and roof installations are in progress, along with the construction of yard-area structures. Approximately two-thirds of the roof is nearing completion, and construction of the green roof will begin next spring.

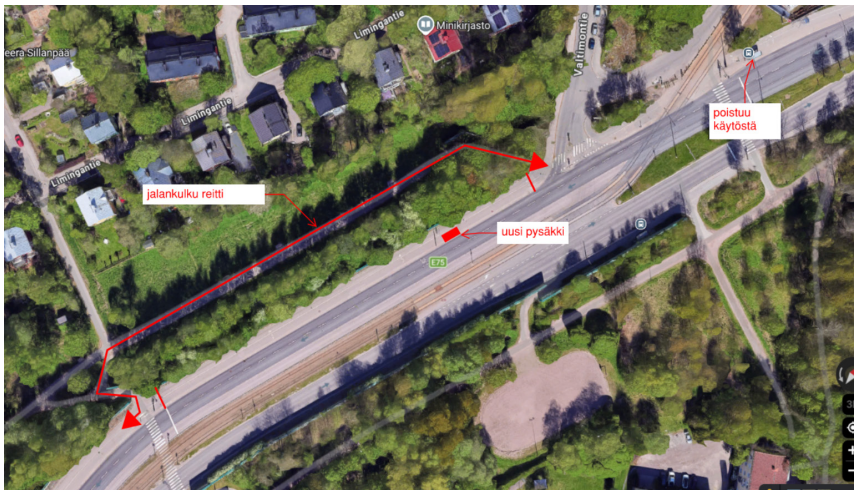

In the yard areas, installation of the sanding system and solar panels is underway, among other works. Construction of the retaining walls in the southern yard area will also begin in the near future.

### Change to the Koskela Depot bus stop

The Koskela Depot bus stop (stop ID H3032), located near the intersection of Kustaa Vaasa Road and Valtimontie, will be relocated. The new bus stop will be situated on the opposite side of Valtimontie.

Relocation work for the bus stop has already begun. During the works, the pedestrian and cycling route at the bus stop location will be closed, and access will be redirected to the other side of the noise barrier. The current bus stop will remain in service until the new stop is commissioned, which is expected to take place around mid-November.

Best regards,
The Koskela Depot project team

The image shows the temporary pedestrian route, the existing bus stop to be removed, and the new bus stop location.

The project is being carried out by Akseli Alliance, which includes the client Metropolitan Area Transport, main contractor Skanska, and planning partners Sweco, Rejlers, and Arkkitehtityöhuone APRT.
